

Aspire Mail DMS Unified Messaging

Still doing business when you cannot get to the telephone?

Does your business need a versatile integrated voicemail that can manage all your voice and data?

In an ideal world, you would always be able to answer your business calls, but in reality that does not always happen and message overload is a problem in modern business life. Although NEC cannot reduce the number of messages your business receives, we can help to make managing them easier.

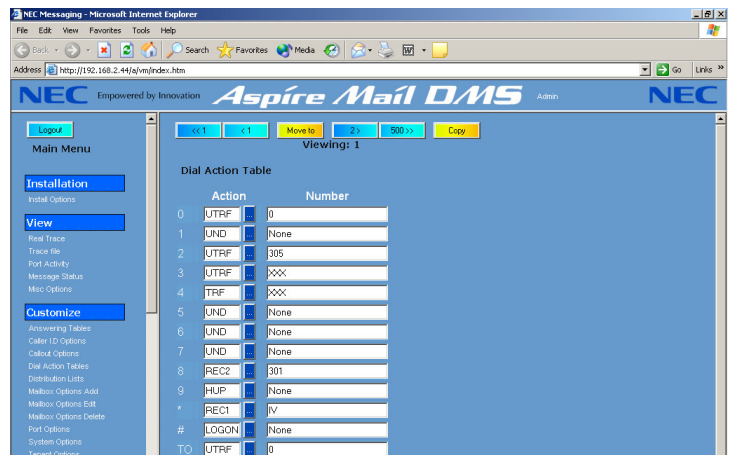

With Aspire Mail DMS, you can now manage all your messages from your preferred messaging application. By using MS Outlook and the Aspire Mail DMS you can not only manage your emails but your voice messages can be converted into emails too. If you are on the road, or in a meeting you can listen to your messages from your mobile phone, laptop or PDA, wherever you can access your emails you can manage your voice messages

When you are in a meeting or away from your desk, you would know that you are not missing essential calls or losing contact with important customers.

Competitive Markets...

With today's competitive market, effective communication is critical to business success; there is simply no place for long call holding periods, incorrect call routing or lost messages. Aspire Mail DMS makes it easier for your company to do good business. The more efficiently your organisation handles its communication the more effective your business becomes.

	Action	Number

Not sure if you want to take an incoming call or not? With the NEC Aspire Mail DSM Voicemail, you can listen to the caller's message as it is being reordered and decide if you want to interrupt and take the call at any point. Moreover, how often have you found that you would like to record part or all of a conversation you are having? With a voicemail solution from NEC, you can record any conversation into your mailbox at the touch of a button.

Integrating with ISDN or IP the Aspire Mail DMS Voicemail also lets you know who has left the message in your mailbox before you listen to it. Hesitant to leave your desk until that important call is received? With the Aspire Mail DMS, you will be free to take care of your business away from your desk. The Park and Page feature can automatically park a certain call and page you over an in-house paging system with your own pre-recorded announcement, then pick up that call from any extension in the building. With the Aspire Mail DMS, you will get one-touch access to your most frequently used integrated voicemail features.
