UNIVERGE VM8000

InMail Solution

Integrated Voicemail and Auto Attendant features for a more professional, productive business.

For today's businesses, there is simply no place for long call-holding periods, incorrect call routing or lost messages. While organisations seek the right solution to address these issues, they also expect improved efficiency, economy and convenience.

VM8000 InMail is an ideal cost effective solution that ensures that all callers get to the people and information that they need, without prohibitive hold times or dropped calls. It provides digitally integrated voice messaging capabilities and Automated Attendant features to meet communication needs both now and in the future.

Improved customer satisfaction

VM8000 InMail's robust Automated Attendant feature set ensures customer calls are routed to the appropriate people and answered quickly and efficiently. When customers call in, an instruction menu announcement is played, to provide them a choice of dialling options. They can simply direct themselves to the called

At a glance

- An embedded solution for the UNIVERGE SV8100
- Improved customer satisfaction
- Increased employee productivity
- Intuitive user interface
- Simple installation, setup and maintenance
- Impressive Voicemail and Automated Attendant capabilities

party without being placed on hold or having their calls dropped.

Increased employee productivity

Employees can also efficiently manage their calls and messages with easy one-touch access to voicemail features. With VM8000 InMail's advanced call processing capabilities, employees no longer need to manually direct and route callers. The Automated Attendant routes each incoming call based upon the time-of-day and day-of-the-week.

The VM8000 InMail solution can even provide different announcements and dialling options for each number in the office.

UNIVERGE VM8000 InMail Solution

Intuitive user interface

The VM8000 InMail Solution's interface is simple to learn and easy to use. Pre-recorded voice prompts offer a step-by-step guide on how to use all the solution's features.

Simple setup, installation and maintenance

VM8000 InMail is digitally integrated with the system's central processing unit to provide increased speed and accuracy to the voicemail system. Additionally, Windows®-based PC Pro enables online centralised HTML-based programming access. When employees use this intuitive browser-based software with its easy to follow wizards, programming time is kept to a minimum.

Specifications

- Ports: 16
- Voice storage: 32 hours*
- Mailboxes: 576 Mailboxes (512 subscribers, 32 group and 32 call routing mailboxes)

*Actual voice storage depends on the number of voice prompt languages loaded on the voicemail media
