

Aspire MyPhone

Making your staff more productive

Aspire harnesses the power of your phone and integrates it with your second most loved office appliance – your PC

Phone styles and features have stayed relatively unchanged for many years. What is so exciting about Aspire is how it harnesses the power of your phone to your PC applications. Aspire MyPhone integrates your phone and PC to make you more productive.

Every Aspire system is supplied with the MyPhone Personal Phone Productivity Manager. The MyPhone browser gives phone users point and click control of their phone preferences and screenpops into MS outlook.

Keeping in touch is made easier – find your contact in MS Outlook, click and you are dialing!

MyPhone provides convergence at the desktop. We all have PC's, and we all have phones. The Aspire MyPhone browser application integrates your most important business tools to make you and your staff more productive.

MS Outlook Integration

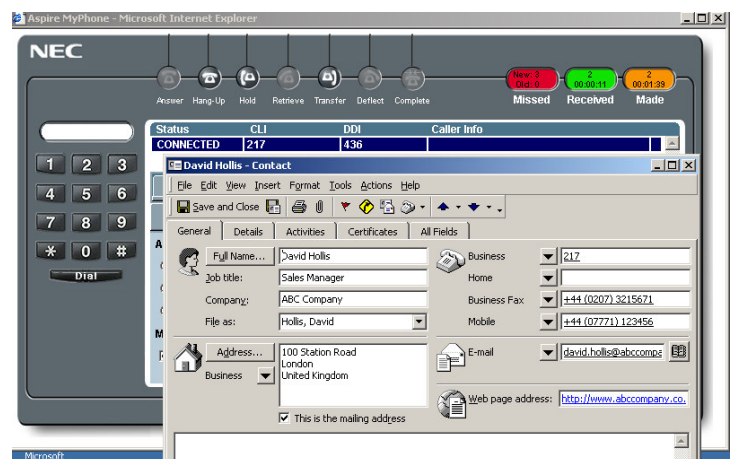

MyPhone automatically links to Outlook using your contacts to provide Point and Click out dialing, and screen popping for people calling you. If their details are in your contact list then

MyPhone will show who is calling before you answer.

Feature Tool Bar

Icon based features put your most used phone features on your PC desktop.

MyPhone Profile Manager

What happens if I get a caller and I am out of the office or on the phone? Where do you want your calls forwarding? MyPhone allows you to get the best out of your phone system.

MyMissed Call Log

This caller said he called five times last week... Keep a record for as long as you like of all calls that you did not answer.

MyCall Log

These are all the calls I have made from this phone. I can see the duration and time of each call.

Deflect

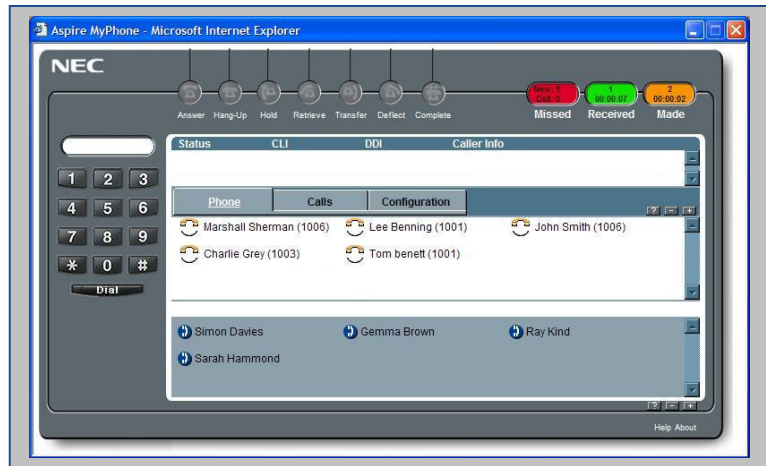

You don't want to take a call, but you don't want to dump it on to voice mail either? Press the MyPhone Deflect button to route the call to nominated colleagues.

Deflect to Voice Mail

VM is so abused nowadays that it has a bad name. This feature leaves you in charge. You decide what calls go to voicemail, not the system

Phone Choice

MyPhone works with any type of phone including DECT Handsets and analogue phones providing information that can be displayed on shared phones or on the PC screen.
